---

The global business landscape has never been more dynamic or interconnected. From entrepreneurs to executives, today's management professionals are finding new ways to maximise return on investment, reach consumers, optimise performance, foster innovation and anticipate challenges. That means those who know how to critically evaluate management issues, analyse complex problems and make informed decisions have an important role to play in a wide range of business settings.

Investment firms  
Financial technology firms

### Sample Roles

Management consultant  
Business analyst  
Economist  
Human resources officer  
Marketing manager  
Project manager

## Which Management Degree Is Right for You?

**Both programmes will give you a core set of quantitative and critical thinking skills, which you'll be able to apply to future studies and your professional development. These degrees also form an excellent foundation for careers or advanced study in other disciplines, like accounting, finance, law and more. Here are some of the key differences between them.**

### **BSc Business and Management**

The BSc Business and Management is ideal for those who are interested in management careers that allow them to engage with international business issues. You could work for a multinational corporation, a consultancy, a startup or similar employers. In addition to developing insight into management challenges from a social science perspective, you can expect to study topics like strategy, economics, marketing, entrepreneurship, finance and management science.

### **BSc Economics and Management**

The BSc Economics and Management is ideal for those who wish to specialise in economics while developing their understanding of business issues and management principles. With a strong quantitative skills set and a deeper understanding of economic theory, you could work for a private or commercial bank, an investment firm, an insurance company or similar employers. In addition to the theory and practice of management, you can expect to study areas like microeconomics, macroeconomics and managerial economics.
